Staff Software Engineer working at the intersection of Design Systems and Generative AI.

EXPERIENCE

Intuit Mailchimp 2019 – Present

Staff Software Engineer · Design Systems Engineering Tech Lead 2025 – Present

- Lead design systems engineering, owning technical direction for the component library and design token architecture that ships across Mailchimp's full product suite.
- Building the UI infrastructure and developer tooling that enables AI-assisted development workflows making it possible for engineering teams to ship faster without trading away accessibility or system compliance.
- Defining how generative AI integrates into UI development at Mailchimp. Published skill plugins and agents for the design system to validate code and reduce prompting feedback loops.

Senior Software Engineer · Experience Platform + Design Systems 2020 – 2025

- Built and evolved Mailchimp's design system across the Experience Platform and Design Systems teams, focusing on scalable component APIs, design token adoption, and cross-team consistency.
- Drove system-wide accessibility improvements, ensuring component patterns met WCAG standards and could be adopted without rework by product teams.
- Worked across the product org to reduce UI fragmentation getting disparate teams onto shared component patterns and away from one-off implementations.

UX Engineer · Design Systems 2019 – 2020

- Joined as a UX Engineer on the Design Systems team, contributing to component development and helping establish the foundations of the design token system.
- Translated design intent into production-ready React components, bridging the gap between design and engineering from day one.

Banyan 2017 – 2019

Frontend Engineer

- Creative agency focused on social good. Built client-facing web applications for nonprofit and advocacy organizations as a frontend engineer at a small, fast-moving agency.

SKILLS

Languages & Frameworks JavaScript, TypeScript, React, Next.js, Vite, CSS Modules, HTML/CSS, Less

Design Systems Design Tokens, Component Architecture, Accessibility (WCAG / a11y), Cross-team Adoption

AI & Tooling Generative AI integration, Claude AI, Github, Git, Storybook, Webpack, Figma

EDUCATION

General Assembly Software Engineering Bootcamp · 2017

Florida State University MBA · 2011 – 2012

Florida A&M University B.S. Accounting · 2007 – 2011

INTERESTS

Amateur knitter and recently picked up sewing and sketching. Enjoy traveling internationally and to national parks.
